Myrex Industries
9119 Weedy Lane
Houston, TX 77093

To Whom It May Concern:

Skanska USA and the team at Lackland ACC Phase 3 would like to commend Myrex Industries for the extraordinary effort given to the timely completion of our project. Thanks in part to your teamwork and dedication we were able to complete the structure ahead of schedule. With over 20 years in the field as a Project Superintendent I've never had a structure delivered as error free as Myrex delivered. Scheduled fabrication times were met and the quality of work produced was exceptional. SidePlate designed structures are among the most technically challenging to fabricate and your staff handled it with ease. Safety, teamwork, trust, and quality are ideals we use in our business everyday- it's apparent Myrex has been building from those values for over two decades.

Thank you Myrex for your part in helping us create a world class facility.

Sincerely,
SKANSKA USA BUILDING INC.

Marcus E Ruiz
Senior Project Superintendent
Lackland Ambulatory Care Center Phase 2 & 3
