RE: UNTHSC – East Parking Garage Renovation – Thank You!

Mr. Moffa,

On behalf of the Vaughn Construction team, I would like to thank both Myrex and Steel Master for their exemplary performance on the UNT Health Science Center East Parking Garage Renovation. Our initial hesitations quickly disappeared once the steel began arriving on site as scheduled and as we were able to watch the erection begin in a safe and efficient manner. Myrex was able to deliver as they promised, and Steel Masters was able to complete the erection faster than we anticipated. There were very few issues that arose in the field and Myrex/Steel Masters was very helpful in finding solutions and expediting any material or installation required. Your efforts on this project have not gone unnoticed throughout our Vaughn DFW office and I look forward to opportunity to work with you again in the near future.
